What is EXION Fractional RF?

This newest skin treatment combines monopolar radiofrequency (RF) and AI for precise energy delivery to deeper skin layers.

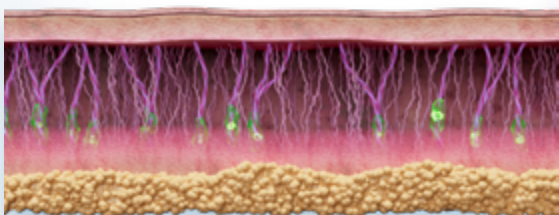

As a result, patients can achieve significant improvements in skin texture, while minimizing the usual discomfort of deep tissue treatments.

FAQ

Am I a candidate?

While everyone can benefit from skin texture improvement, this treatment holds particular advantages for individuals who are worried about wrinkles, acne scars, stretch marks, and old injury scars.

Is Fractional RF treatment suitable for all skin types?

Clinical studies evaluated safety and efficacy on all skin types. Your provider will tailor the treatment precisely for you!

How does the therapy feel like?

The treatment may cause a warm and slightly prickly sensation throughout the treated area. While some individuals may require numbing beforehand, most people undergo the therapy with no need for numbing and experience only mild discomfort during the treatment.

How fast will I see results?

Typically, noticeable improvement can be observed about one month after the treatment, while the most significant results are often reported three months after the last session.

What areas can be treated with EXION Fractional RF?

This procedure can be used to address various skin concerns on both face and body. Some of the most common areas to be treated include the cheeks, forehead, perioral, and periorbital areas.
